

Project Development Phase

Date	09 November 2022
Team ID	PNT2022TMID51098
Project Name	Real Time River Water Quality Monitoring System

Sprint 2

The screenshot shows the IBM Watson IoT Platform interface. The top navigation bar includes 'Browse', 'Action', 'Device Types', and 'Interfaces'. The main content area displays the 'Recent Events' tab for a device. A table lists five events, each with a unique ID, a JSON payload, and a timestamp. The table is as follows:

Event	Value	Format	Last Received
event_1	{"ph":9,"turb":45}	json	a few seconds ago
event_1	{"ph":7,"turb":50}	json	a few seconds ago
event_1	{"ph":14,"turb":75}	json	a few seconds ago
event_1	{"ph":10,"turb":93}	json	a few seconds ago
event_1	{"ph":5,"turb":36}	json	a few seconds ago

At the bottom of the interface, there is a status bar indicating '1 Simulation running' and a watermark for 'Activate Windows'.
